Subject: Re: Falcon Refinery: Request for Information

Gary:

It is my understanding that there was ~22,000 barrels of (treated) water in Tank 12. I will send someone down to confirm prior to Brian's arrival next week. I will also check with our consultant and TCEQ with regards to the Irrigation water release permit.

Regards,

Jonathan Carroll

Jonathan/Scott,

The following items is one the of currently one of the 4 items you guys have left to complete before the removal action is satisfied (unless I need to add more items):

Tank 12 (Material moved from T13): Treat/Dispose of oily water and remove/dispose of any accumulated tank bottoms;

Refinery Piping/Equipment

I need to know how much material remains In Tank 12. I also need to know the status of your work to get a permit from TCEQ for irrigation purposes for this water or if it will be disposed.

I need this information today.

Thanks
